A detailed botanical illustration background featuring various plants. In the top left, there are pink flowers and green leaves. In the top right, there are white flowers and green leaves. In the bottom left, there is a large yellow flower with a dark red center and green leaves. In the bottom right, there is a yellow lemon and green leaves. The central text is enclosed in a white rectangular box with a thin black border.

Learning and the Brain Conference 2015

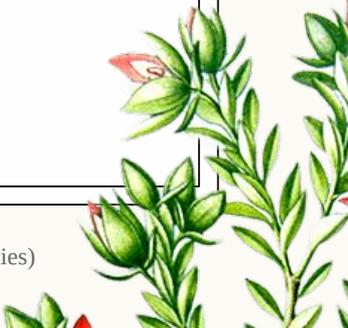

Best ways to teach

Include Problem Solving (Challenge)
Allow for **Creativity** and
Collaboration.

**Students
collaborating
on a STEM
project.**

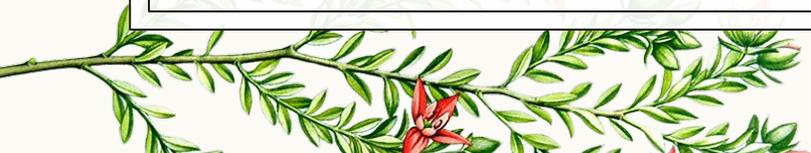

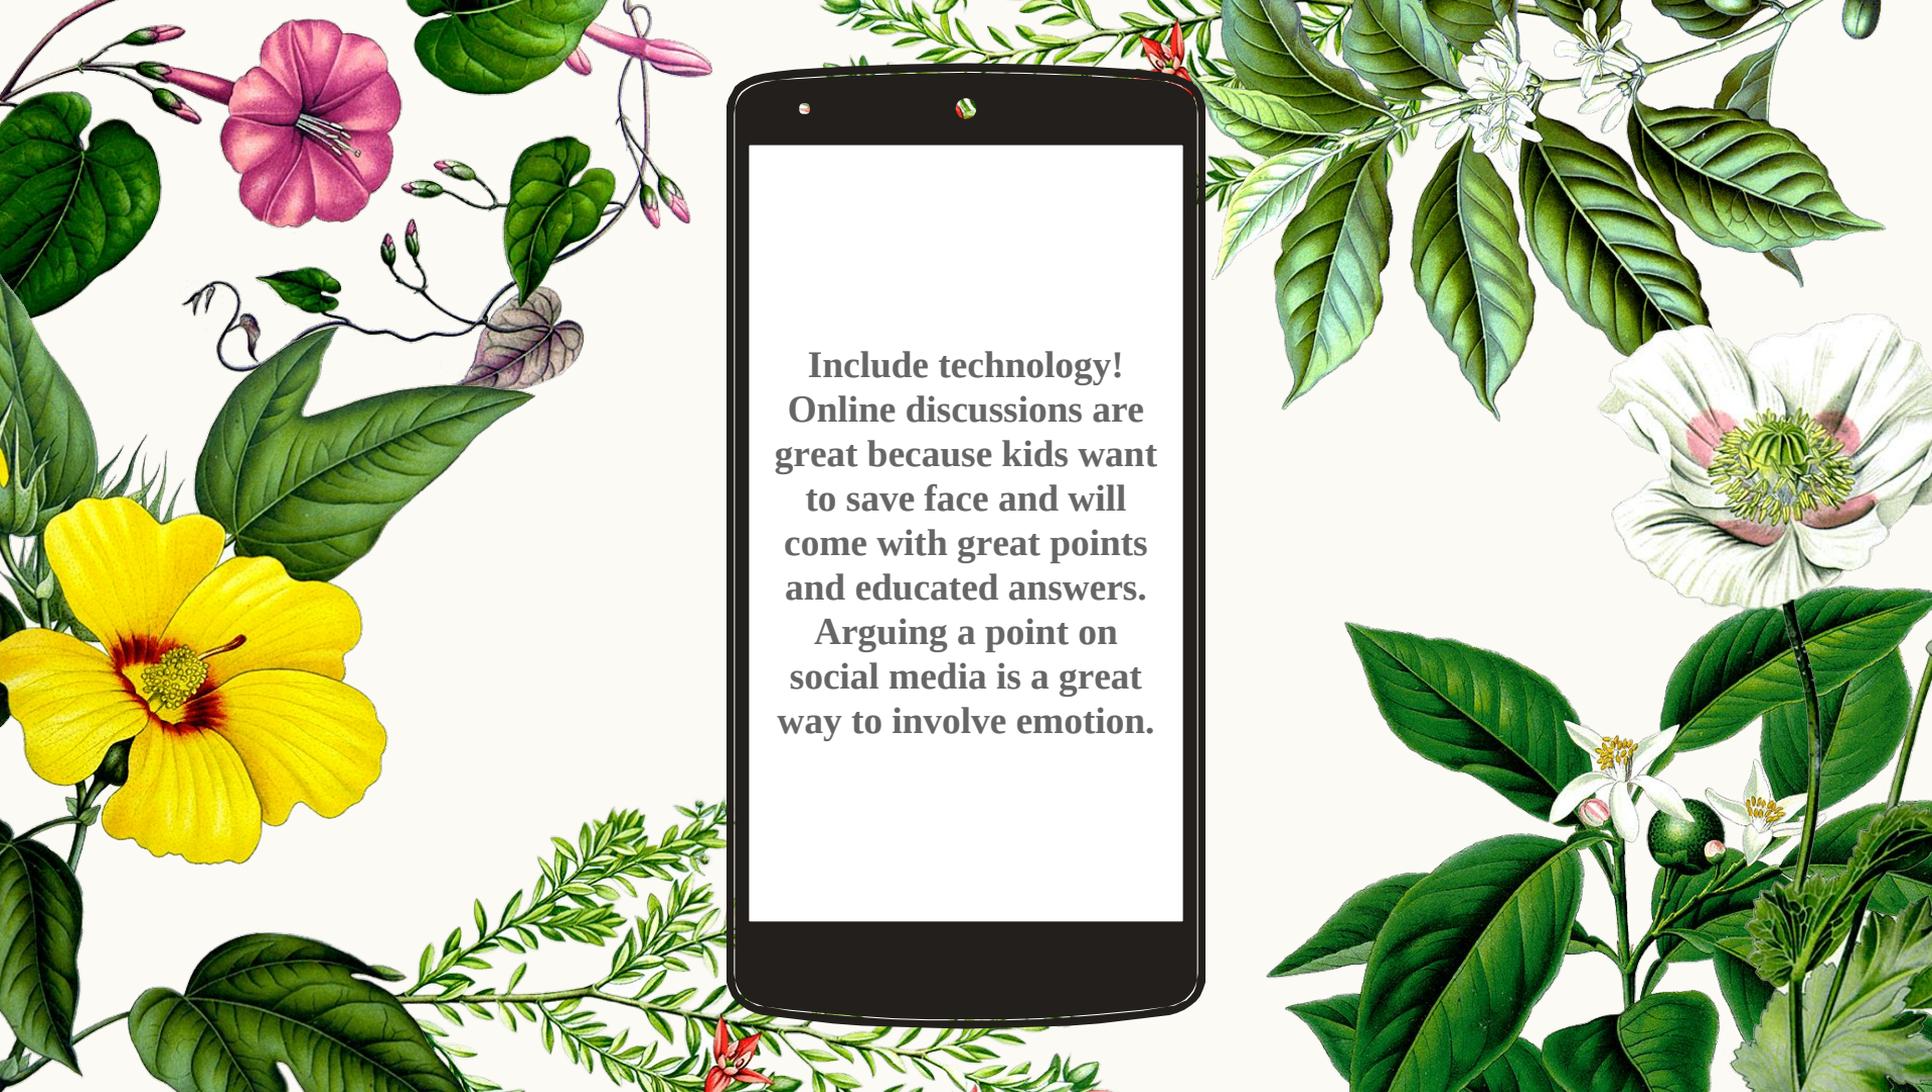

*Students using creativity
to design a
Zip Line chair to carry a Lego man
to safety from a burning island*

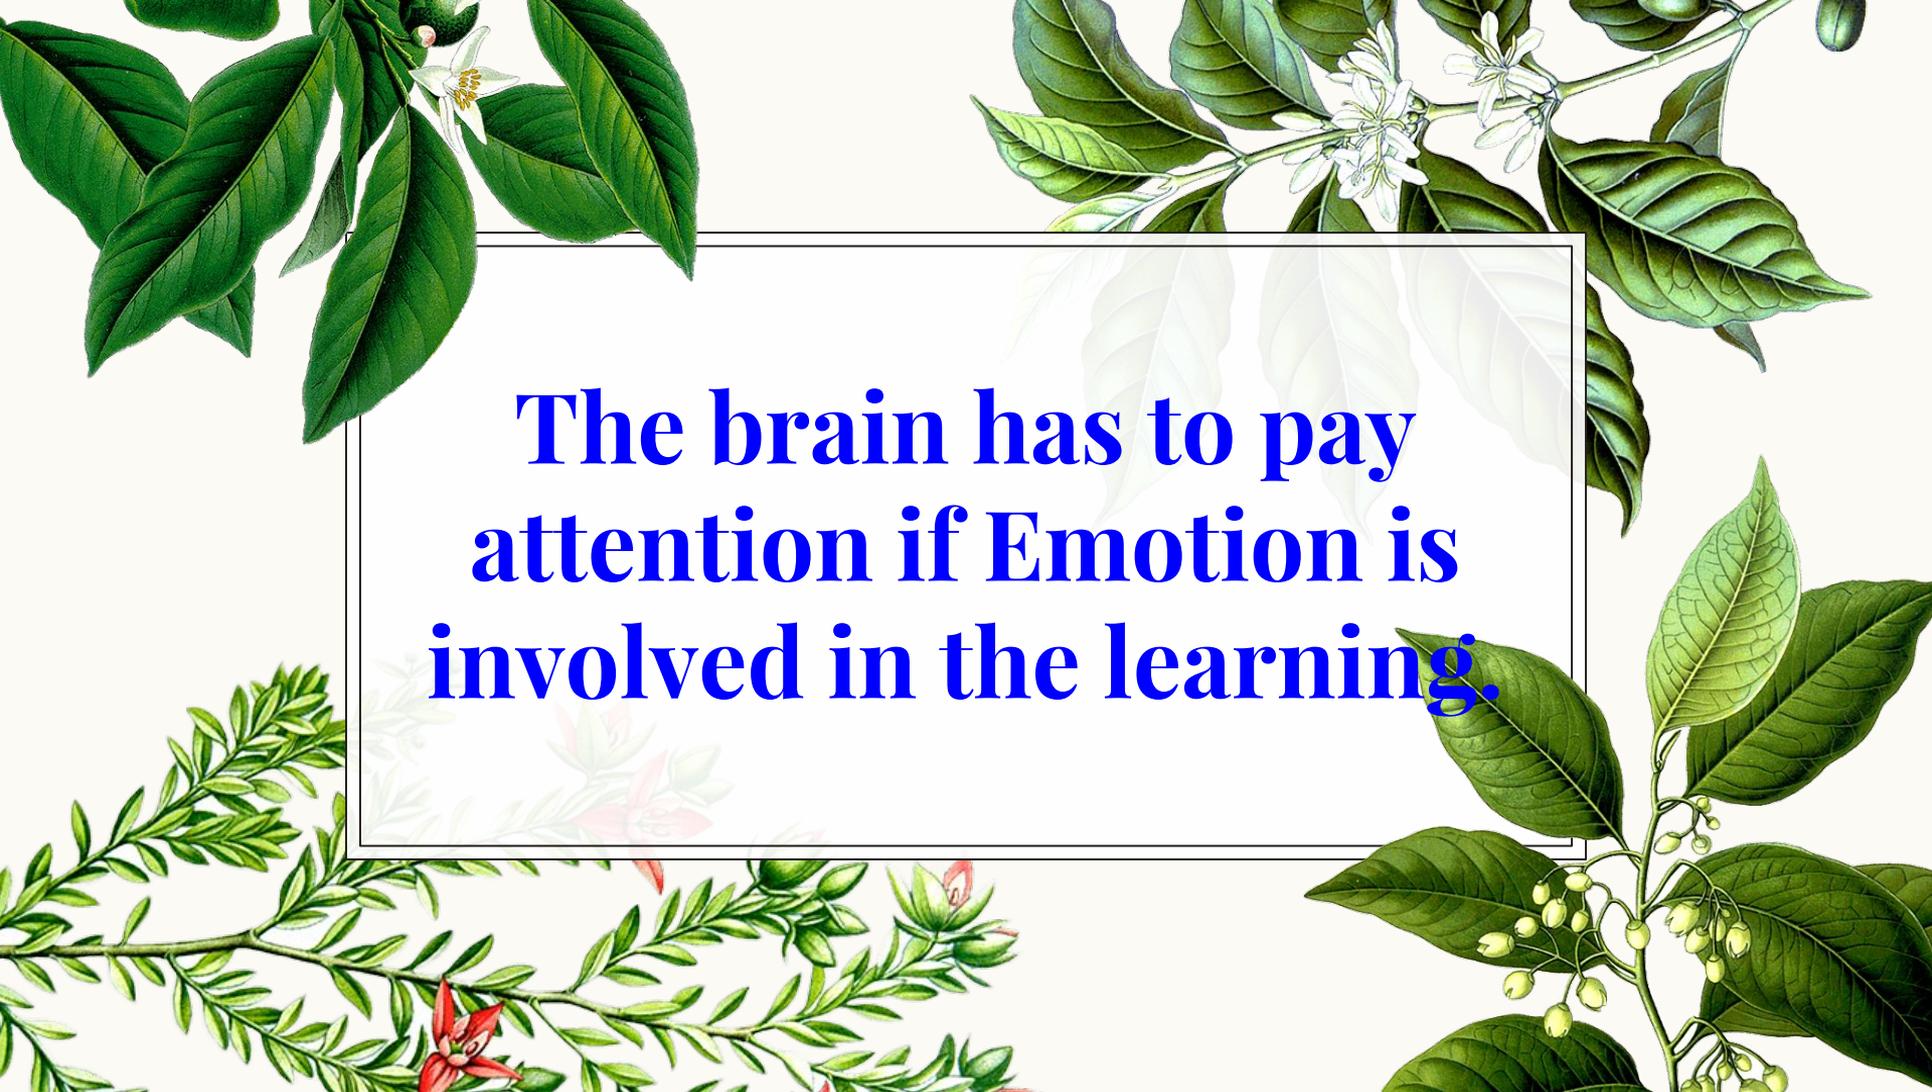

**Learning needs to involve
EMOTION!
Eg: Defend or Argue a point**

Include technology!
Online discussions are great because kids want to save face and will come with great points and educated answers.
Arguing a point on social media is a great way to involve emotion.

The brain has to pay attention if Emotion is involved in the learning.

ALWAYS include reflection time. It connects learning to self. Rest is not IDLE.

Quote from Conference

“Emotions that rely on abstract inferences recruit a brain network whose activation is incompatible with external attention.”

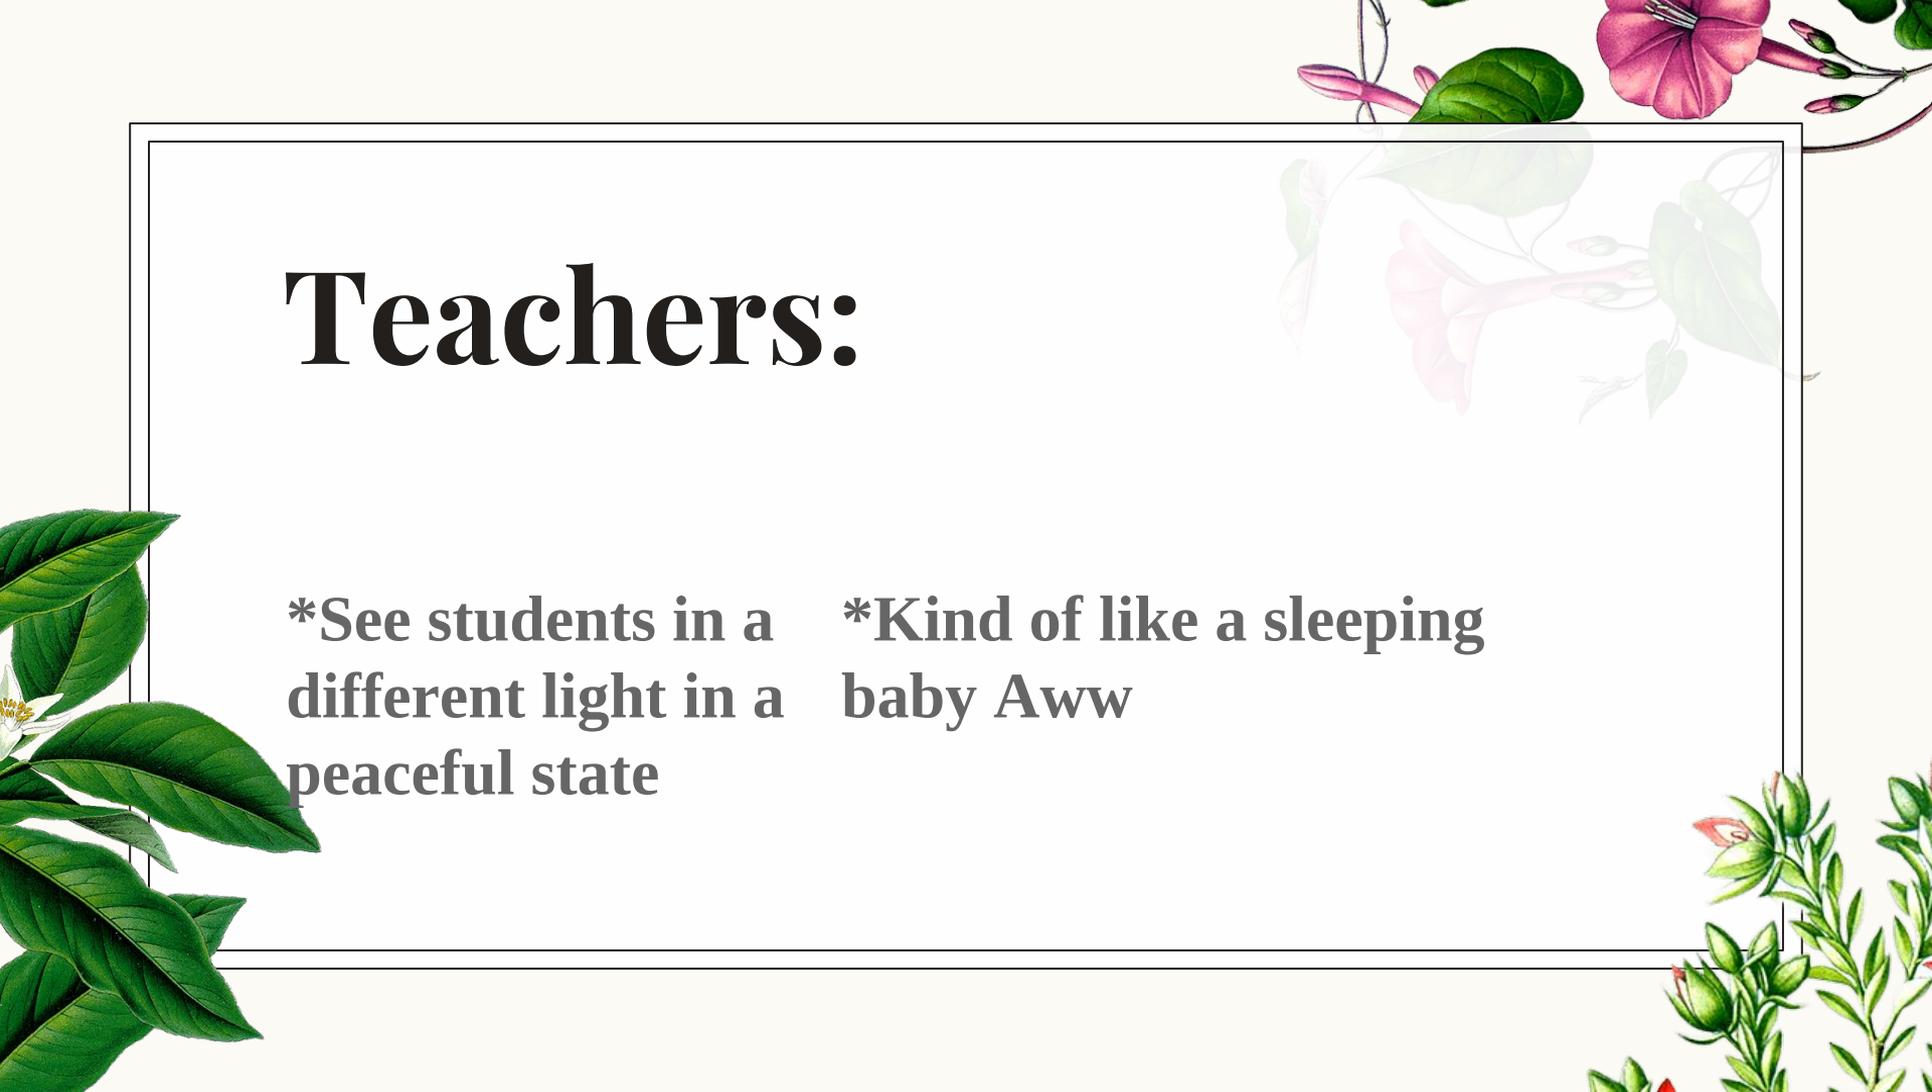

Meditation: As
important for
teachers as it is
for students.

Students Meditating

Teachers:

***See students in a
different light in a
peaceful state**

***Kind of like a sleeping
baby Aww**

Students

**A minute to
themselves to think
and reflect.**

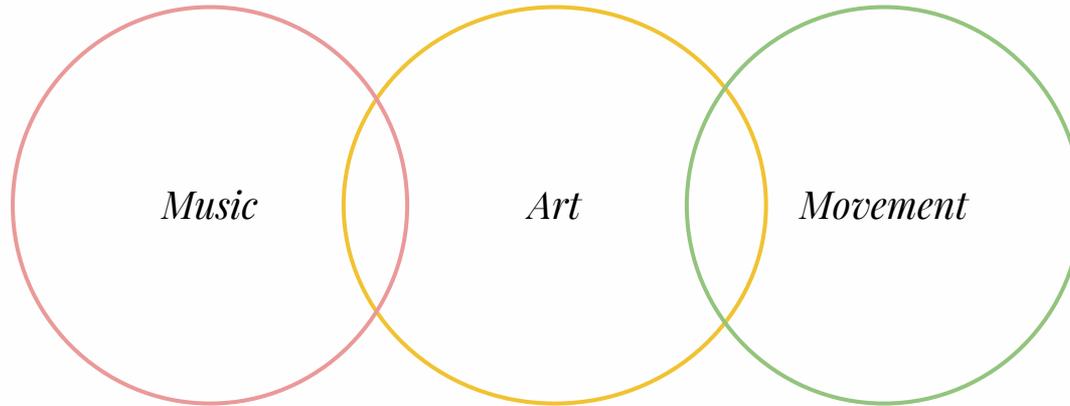

**Gives them a
peaceful time to
focus in a calm state**

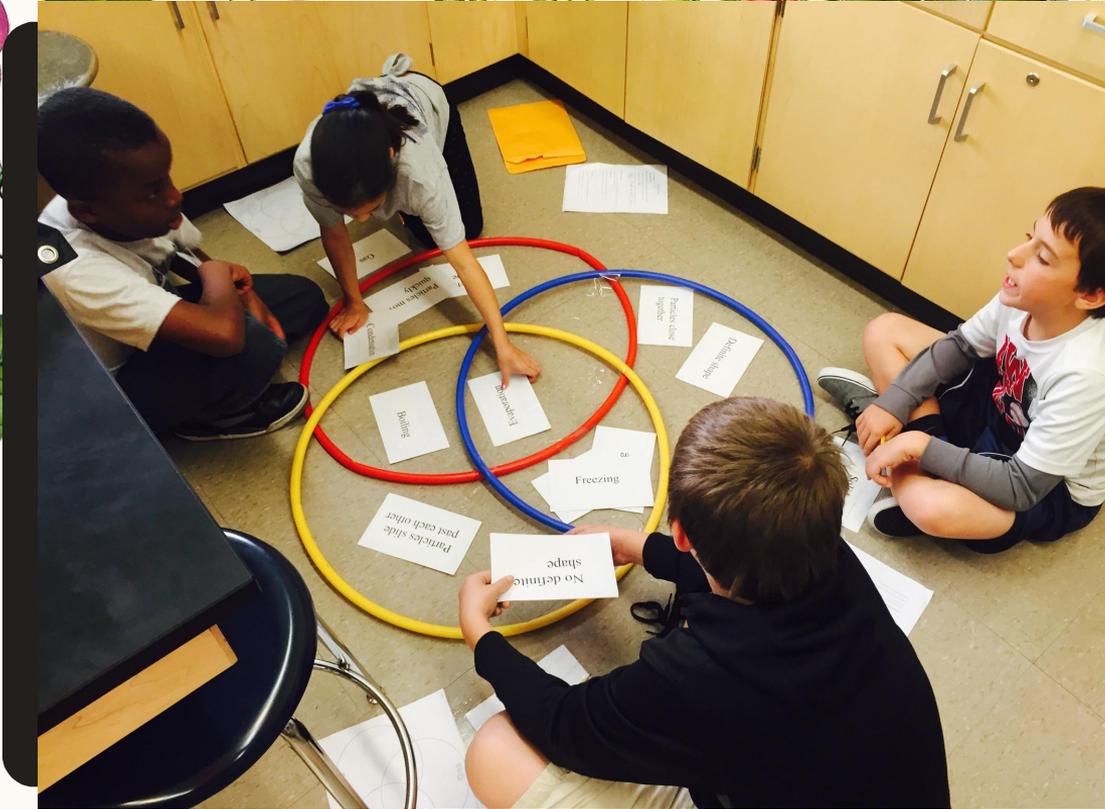

**improves behavior
because it gives them time
to process what is going
on in their lives before
they react in a negative
way.**

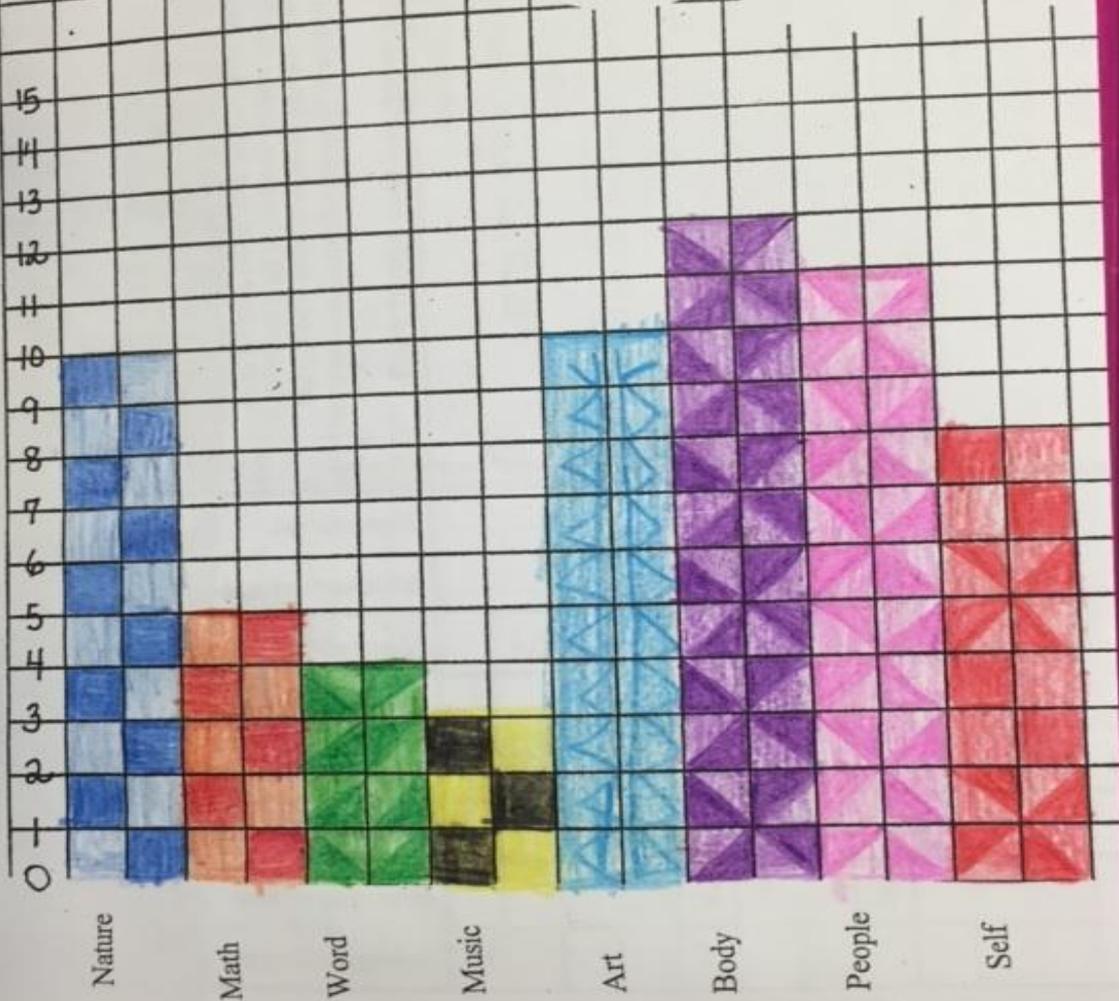

Find out and incorporate learning styles

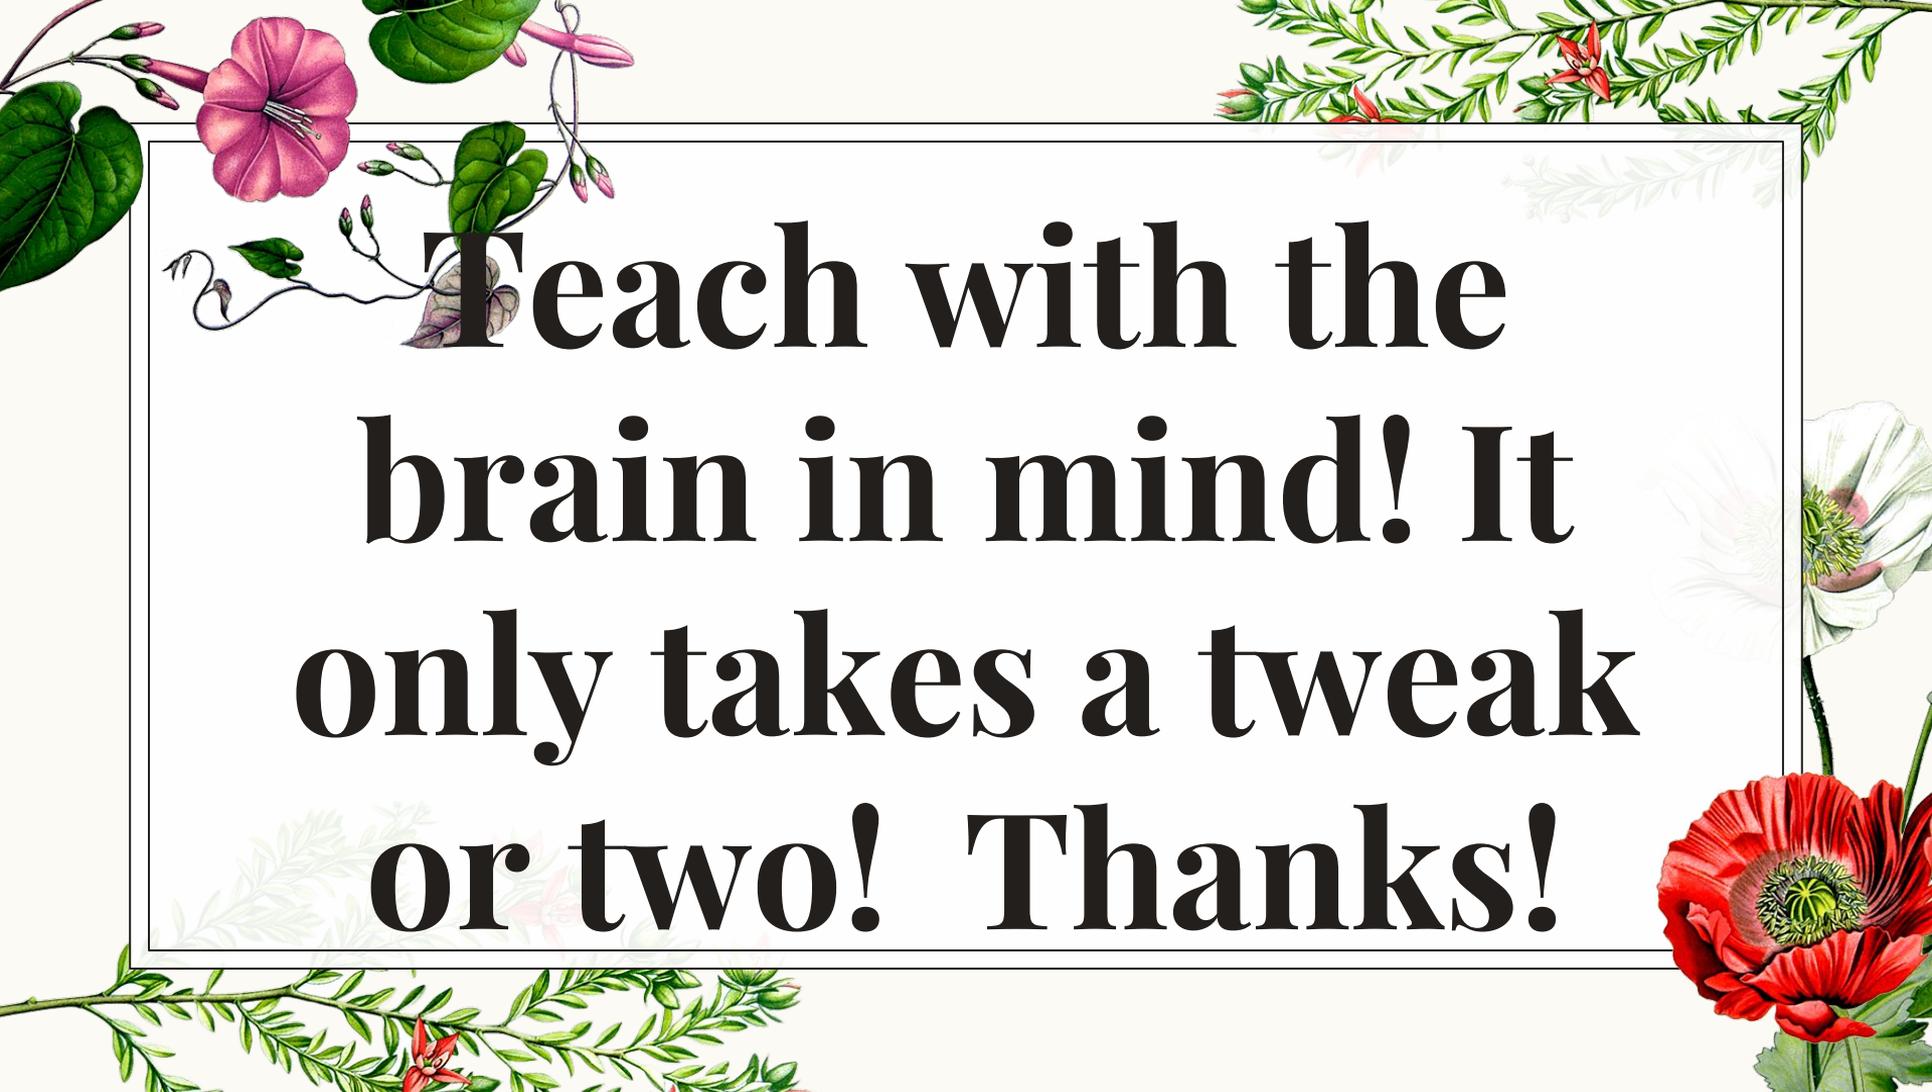

My Score

**Teach with the
brain in mind! It
only takes a tweak
or two! Thanks!**

**Thanks to NEA
for the grant!**
