## Solving Addition Problems

Name:

Date:

DIRECTIONS: Try the first two problems in each section. Check the answer key. If both answers are correct skip to the next section. If one or both are incorrect, use the answer to find the mistake and complete the rest of the section.

### TIERED PRACTICE

#### SECTION 1 Solve each addition problem.

- |                |                |
|----------------|----------------|
| 1. $350 + 24$  | 5. $89 + 57$   |
| 2. $212 + 45$  | 6. $36 + 43$   |
| 3. $96 + 56$   | 7. $803 + 77$  |
| 4. $576 + 323$ | 8. $244 + 654$ |

---

#### SECTION 2 Solve each addition problem.

1. Sam and Grace each had four pencils. How many pencils did they have together?
2. There were three toys in the blue bin and five toys in the green bin. How many toys were there all together?
3. There were 14 classrooms on the first floor and 25 classrooms on the second floor. How many classrooms were there in all?
4. The black cat had six kittens. The white cat had 8 kittens. How many kittens did the two cats have altogether?

---

#### SECTION 3 Solve each addition problem.

1. The teacher had 23 students in her first class, 29 students in her second class, and 19 students in her third class. How many students did the teacher have in all of her classes?
  2. There were 567 fifth graders, 453 sixth graders, 234 seventh graders, and 398 eighth graders. How many students were in the school?
  3. Jake made \$450 in June at his summer job. He made \$512 in July and \$600 in August. How much money did Jake make over the summer?
  4. Tom bought two games. One cost \$30 and one cost \$76. How much did they cost in all?
